

# Phytocompo™ Series

## Composite

Phytocompo™ & Composite series are complex of **Hydrogenated Lecithin & Phytosterol/Cholesterol**. Possible to emulsify without combining EO groups (polyoxyethylene alkyl ether group) or non-ionic emulsifiers such as polyglyceryl fatty acid ester groups.

## Benefit of Phytocompo™ & Composite

- Can emulsify any oils
- HLB free
- Provides high-moisturizing effect
- Provides excellent smooth texture
- Provides water repellency coating
- Phytocompo™ series is 100% plant derived (Phospholipids part)

## Product Line-up

### Composite-PC

Product Name	INCI Name	Features
<b>Composite-PC</b>	Hydrogenated Lecithin, Cholesterol	Hydrogenated Lecithin content: approx. 80% PC content: 25 to 35%

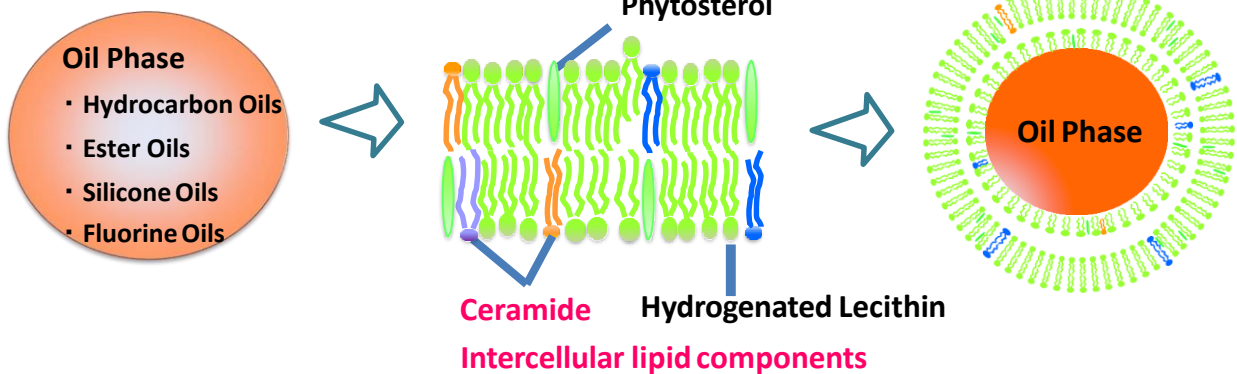

### Phytocompo™-PP 100% plant derived

Product Name	INCI Name	Features
<b>Phytocompo™-PP</b>	Hydrogenated Lecithin, Phytosterols	Hydrogenated Lecithin content: approx. 90% PC content: 25 to 35%

Product Name	INCI Name	Features
<b>Phytocompo™-C</b>	Hydrogenated Lecithin, Phytosterols, Ceramide NG/NP/AP	Hydrogenated Lecithin content: approx. 80% PC content: 25 to 35%
<b>Phytocompo™-C5</b>	Hydrogenated Lecithin, Phytosterols, Ceramide NG/NP/AG/AP	Hydrogenated Lecithin content: approx. 80% PC content: 25 to 35%

**Phytocompo™-C/C5 = “inter cellular lipid ingredient emulsifiers”**  
that have multiple ceramides in the phospholipid.

- **Phospholipid complexes with various ceramides.**
- **Can be emulsified by using only skin inter cellular lipids.**
- **Can be emulsified by using only Phytocompo™-C with any oils as with Phytocompo.**
- **Can use with ingredients difficult to dissolve without concern for solubility of oils (silicones, oils that feel good on skin).**
